DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 34-38, drawn to the isolated polypeptide, classified in class 530, subclass 350.

Claims 34 and 35 are generic to a plurality of disclosed patentably distinct species comprising human OAT polypeptides. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed. Applicant must elect **a single human OAT polypeptide encoded by the nucleic acid (SEQ ID NO:)** and **a single human OAT polypeptide (SEQ ID NO:)**. The species differ because they are drawn to a diverse set of sequences each with patentably distinct physical and functional characteristics. The nucleotides and polypeptides are composed of different coding regions, different sequences and/or impart structural and functional differences and would require a non-coextensive search.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, separate search requirements, and/or recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Regina M. DeBerry whose telephone number is (571) 272-0882. The examiner can normally be reached on 9:00 a.m.-6:30 p.m. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Brenda G.
